WHATS ARE NFT'S

1 **Unique Digital Assets**
NFTs are unique digital assets that represent ownership of specific items like artwork, music, or even virtual real estate.

2 **Blockchain-Based**
NFTs are stored on a Blockchain, a decentralized ledger that ensures transparency and security of ownership.

3 **Certifying Authenticity**
NFTs serve as proof of ownership and authenticity for digital assets, preventing counterfeiting and fraud.

OUR MISSION

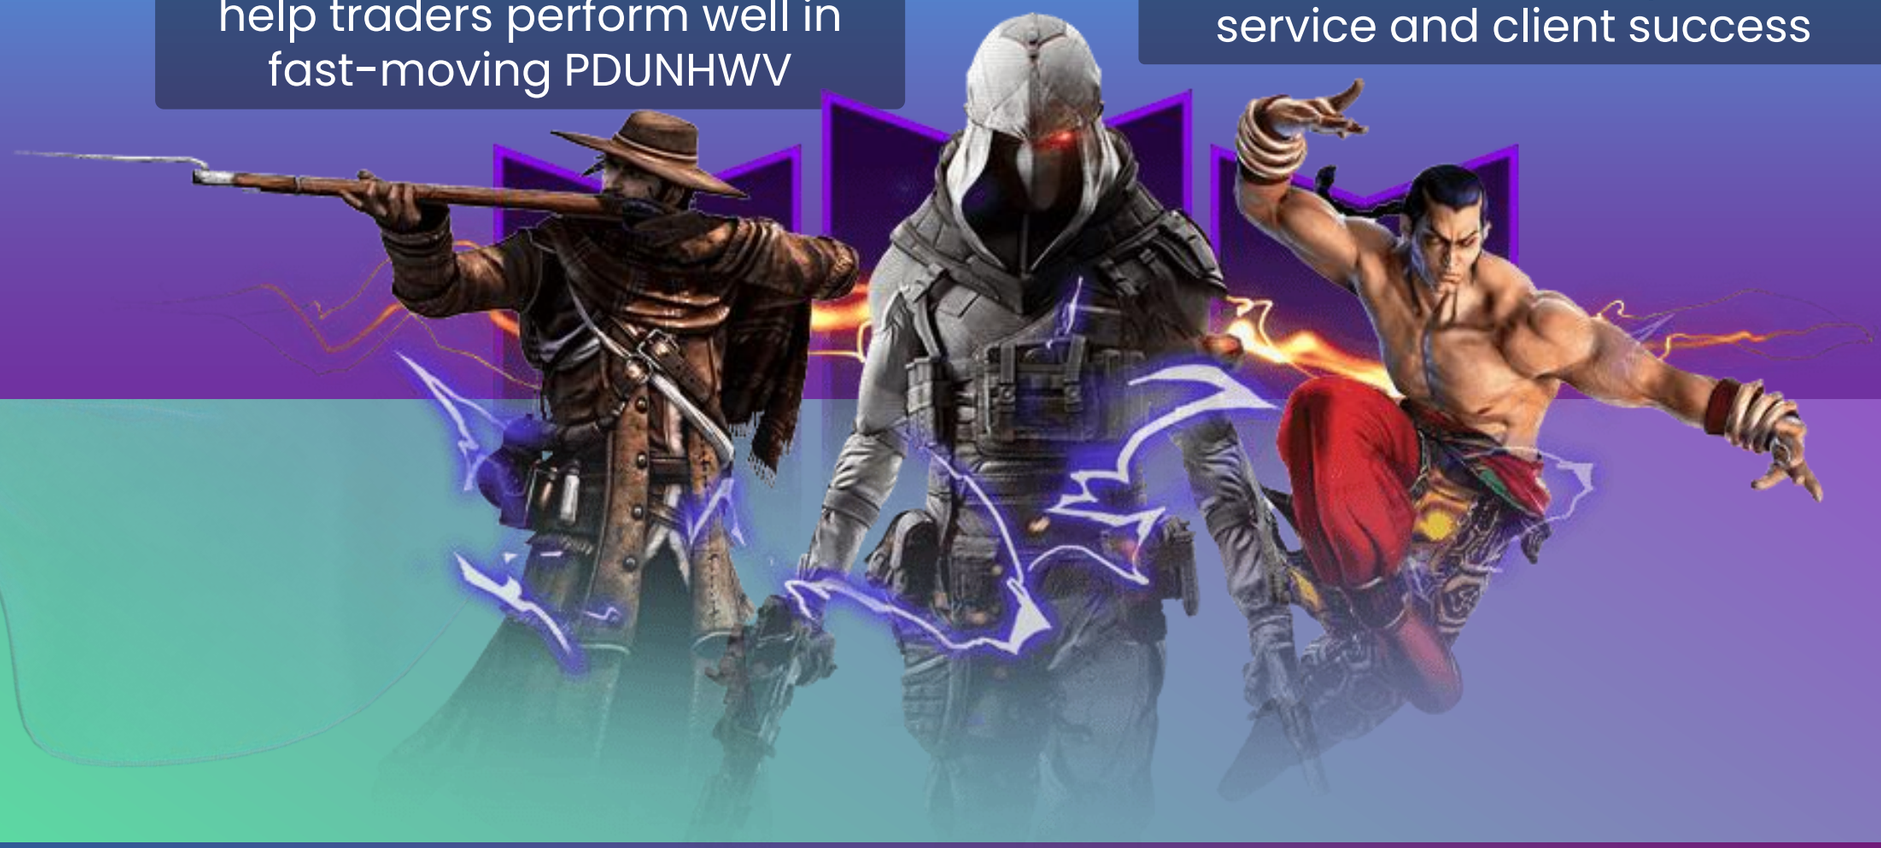
To provide secure, innovative trading platform by utilizing progressive and emerging technologies.

TOOLS & SUPPORT

Offer tools and information to help traders perform well in fast-moving PDUNHWV

SERVICE FOCUS

Dedication to exceptional service and client success



OUR VISION

We aim to be leading provider in NFT market

1 **FOCUS**

Innovation, transparency, and growth for traders at all levels.

2 **LONG-TERM GOALS**

Set industry standards for quality

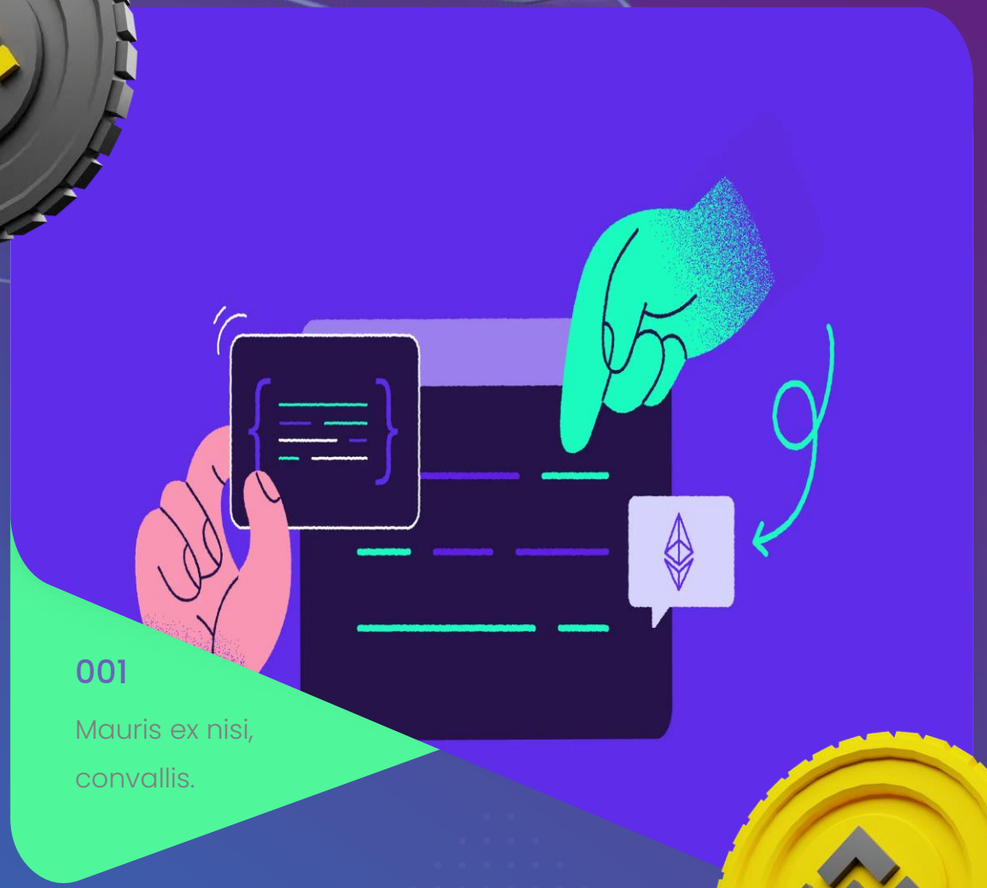
BEP 20 BLOCKCHAIN

BEP-20 is a token standard on the Binance Smart Chain (BSC), designed to facilitate the creation and management of tokens that can be transferred, stored, and interacted with on the blockchain. Inspired by Ethereum's ERC-20 standard, BEP-20 offers similar functionality but operates on BSC, a faster and more cost-effective blockchain platform.

SMART CONTRACT

What It is?

Program that automatically executes the terms of an agreement between two parties.



001

Mauris ex nisi, convallis.

How it works?

Smart contracts are stored on a Blockchain, a distributed database that records transactions and cannot be changed. When a condition is met, the smart contract is executed, and the results are recorded on the Blockchain.

Automate Agreements:

Smart contracts can automate the execution of an agreement, such as a mortgage transaction, without the need for an intermediary.

Improve Traceability:

Smart contracts can improve traceability by recording every step of a product in a supply chain.

100% DECENTRALISED

What It is?

Decentralized is a system where users can participate in financial activities without relying on traditional financial institutions. Its protocol are based on the Blockchain, a public ledger, which makes all transactions and operations transparent and accessible to the general population.

Demerits of a Centraliz ed system

Controlled by governments, subject to inflation, and susceptible to manipulation.

AINFTPAY

Registered Trade on various Exchange

CENTARLIZED VS DECENTRALIZED CURREMCY

Centralized Currency

- ✓ It is in the hands of the Government.
- ✓ The government can close the currency whenever it wants.
- ✓ The government can change whenever it wants.
- ✓ Its price remains the same as the quantity a person has.
- ✓ Centralized Currency Example: $, £,Rupee

Decentralized Currency

- ✓ No government or individual has control over it.
- ✓ No government of any country can stop it.
- ✓ No changes can be made here even if you wanted to.
- ✓ It's price can change anytime.
- ✓ Decentralized Currency Examples- BTC, Matic Various.

PAYMENT METHODS

TOKEN POCKET	TRUST WALLET	METAMASK

Transaction Mode: BEP20
